RainSoft turns ordinary water into extraordinary water . . .

Ultrefiner II

Premium Drinking Water System

The Ultimate Drinking Water Solution.

With an Ultrefiner II Premium Drinking Water System comes confidence in knowing that you're providing your family with the finest drinking water system available.

RainSoft drinking water systems are noted for being highly efficient and effective when it comes to delivering superior drinking water your family relies on. The Ultrefiner II utilizes three high quality multi-stage filters designed to address virtually any drinking water concern. Your local RainSoft dealer can help assist you in selecting a system that best fits your water concerns and local water conditions.

The Ultrefiner II system provides multiple lines of defense to protect the drinking water your family relies on with its high efficiency carbon block sediment pre-filter, highly effective membrane designed to filter on a molecular level, and superior carbon block sediment post-filter that reduces Volatile Organic Chemicals (VOC's).

RainSoft turns ordinary water into extraordinary water . . .

The smart, economical way to enjoy the best water possible.

How an Ultrefiner System Works

1. Water from the inlet valve enters the system.
2. Water is forced through the pre-filter cartridge that reduces particles, chlorine, taste and odor.
3. Water then enters the reverse osmosis cartridge where it is filtered through a spiral wound, semi-permeable membrane.
4. The resulting highly filtered water enters a storage tank.
5. Your reverse osmosis water is finally filtered through the system post-filter and dispensed through a dedicated drinking water faucet.

The Ultrefiner II Delivers Superior Filtration

The Ultrefiner system uses reverse osmosis technology to filter extremely small particles, particles that can easily slip through a less sophisticated filter.

The Ultrefiner II is installed with a contemporary, lead-free RainSoft faucet offered in brushed nickel and chrome to accommodate any home décor.

System Features

- The system incorporates an easy fast-flush setting.
- Produces very low sodium "ingredient quality" water for drinking and cooking.
- Earth friendly filter design results in disposal of only the filter cartridge rather than the full canister.
- Equipped with a pre-filter, membrane, and post filter designed to effectively reduce chlorine, lead, chromium, copper, and VOC levels from your drinking water.
- Cost saving maintenance – designed with 3 filters rather than the industry average of 5 filters.

NSF ISO 9001:2008 AQUION

Ultrefiner II models FMV-BNFP, FMV-BNFV, FMV-CHFP, and FMV-CHFV are certified by the NSF to NSF/ANSI Standard 58. Ultrefiner II models FMV-BNFP, FMV-BNFV, FMV-CHFP, and FMV-CHFV conform to NSF/ANSI standard 53 for VOC reduction. See performance data sheets for specific reductions claims, individual contaminants and reduction performance.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion, Inc. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion, Inc. does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
